Tools and Materials you might have at home

- Rolling pin
- Pencil
- Knife
- Spoon
- Rice paddle
- Fork, comb or other items that can be pressed into clay to add texture and details.

Your sculpture will not be water tight. If you would like to use your project as a vessel you will need to insert something inside. A small glass or tin is perfect for this.

Allow your finished clay coil sculpture to dry out in the open. This can take a few days.
